SKILLS AND FRAMEWORKS

Languages	Javascript, HTML/CSS, Java, Python, C++, SQL, Rust (Beginner), Typescript(Beginner)
Backend Frameworks	Node.js, Spring and Spring Boot (Beginner), FastAPI, OAuth, RESTful API
Frontend Frameworks	React.js, Vite+React, Tailwind CSS, Bootstrap, Vanilla JS
AI Tools	Ex-Cursor, Ex-ChatGPT 5.2, Claude Code, Claude Sonnet 4.6, Claude Opus 4.6, Gemini

PROJECTS

forintl February 2026 - Present
Unified Portal of Rules and Regulations for an International Student
Tech Stack: Typescript, Vite+React, PostgreSQL, ChatterBot

- A website engineered to stack up all the scattered information concerning Rules and Regulations for an International Student in the USA, on the web.
- After completion this site will be able to answer all the queries an international student would have.
- A meaningful feature in the pipeline is to help students ask questions using a chatbot. Furthermore, another feature to be introduced in the pipeline is to connect a student with an immigration lawyer for a First Time Free Consultation

AI Powered Itinerary Generator Sept 2025 - Dec 2025
Itinerary Generator powered by Gemini to automate road-trip planning
Tech Stack: Vite+React, FastAPI, PostgreSQL, Gemini, render for hosting, supabase for management

- Engineered an AI-Powered Itinerary Generator integrating FastAPI, Vite+React, and Generative AI (Gemini) to automate road-trip planning.
- Designed scalable CRUD architecture with secure user management.
- Optimized itineraries via contextual LLM prompts, and enhanced user experience by minimizing manual research and ensuring data-driven travel personalization.

OverLifter Dec 2024 - May 2025
Regex Free Resume editing platform for LaTeX based Resumes
Tech Stack: Python, Streamlit for hosting

- Built a full-stack resume editing platform using python and StreamLit, enabling non-technical users to update LaTeX resumes via clean UI without touching code.
- Designed the app to be ATS-optimized, maintaining machine-readable structure while hiding LaTeX complexity from users.

EDUCATION

Master of Science in Computer and Information Science Jan 2024 - Dec 2025
University of Michigan, CGPA: 3.71/4.0
Major Project: AI-Powered Itinerary Generator,
Link: <https://cis525-frontend.onrender.com/>

Bachelor of Technology in Computer Science and Engineering August 2019 - August 2023
JNTU-Hyderabad, CGPA: 3.1/4.0
Major Project: Key Based Secure and Energy Efficient Multipath Routing in Wireless Sensor Networks,
Paper: https://www.irjmetcs.com/uploadedfiles/paper/issue_6_june_2023/41655/final/fin_irjmetcs16861515.pdf
